

AbstractTableModel

ArrayList< backend.Record >

backend.Data

list

```
graph BT; backendData[backend.Data] --> AbstractTableModel[AbstractTableModel]; backendData -.->|list| ArrayList[ArrayList< backend.Record >];
```

The diagram illustrates the relationships between three classes: AbstractTableModel, ArrayList< backend.Record >, and backend.Data. AbstractTableModel and ArrayList< backend.Record > are represented by white boxes with black borders at the top. backend.Data is represented by a gray box with a black border at the bottom. A solid blue arrow points from backend.Data to AbstractTableModel. A dashed purple arrow points from backend.Data to ArrayList< backend.Record >, with the label 'list' placed next to it.
